

Food Breaking Machines are economical and practical machines for small and medium family enterprises. The machine is making thin all of beans and corn from bengalit's times on. Its working with house electric. Specialty you are making plane, pulp and strow with its changeable second knife. Its make food everything useful for animals.(rotten beet, patoto,apple and wet fruit honde and hulls etc.) in this was its transport to high production and economy. For example, the farms having five animals. in this from the former dos pay money for machine. The former does win this money in four month again. in this way production is two fold increaus with canscious food. The machine; have five sifters this sifters does have hole of diffend dimension

### ELEKTRİKLİ YEM KIRMA MAKİNASI

### Technical Specifications

EN	71 cm	Width
BOY	91 cm	Length
YÜKSEKLİK	122 cm	Height
ELEK ÇAPI	740	Sieve Diameter
BUĞDAY KAPASİTESİ	700-800 kg / saat	Grain Capacity
ARPA KAPASİTESİ	700-800 kg/ saat	Barley Capacity
MISIR KAPASİTESİ	700-800 kg / saat	Corn Capacity
<b>ELEKTRİK MOTORU</b>		<b>Electric motor</b>
GÜCÜ	4 hp	Power
HIZI	80%	Speed
GİRİŞ KW	3.5 kw	Input KW
ÇIKIŞ KW	3 kw	Output KW
VERİM	80%	Yield
1/MİN	2870	1/min
VOLTAJ	220 V/380 V (ops.)	Voltage
