

This is an ideal machine for sowing; wheat, barley, oat, lentil, chickpea, bean etc. For grain and pulses seeds.

Cereal Seed Drill Machine that provides changeover from sowing to destination position are manufactured as 12, 14, 16, 18, 20, 22, 24, 26, 28 and 32 discs, optional 40 disc.

Seeding distance: standard 14 cm, and optional: 12.5 cm and 13 cm Combined seed drill is a sowing machine that transfers the seed, pulses, feed grains and fertilizer to the seed bed opened by the discs continuously, thanks to the helical sheaves, with the requested quantity and depth with the help of levelling system. Thanks to its structure, the hopper prevents seed and fertilizer to accumulate and therefore, an efficient seeding is performed by protecting bearing with the dusting system using dry system double bearings on the discs and by automatic or hydraulic disc penetration setting, which is performed optionally, that allows easy planting of the seed or fertilizer into the requested depth and it is easy to clean thanks to its discharging levers on each hopper.

Besides these standard features of our combined grain seeder, both three-point hitch and arrow system are its standard specifications. Thanks to these features, it is suitable for planting, seeding and operation with a tractor on all types of soil conditions. r and seed into the equal depth.
