

- Mounted type mower which is driven by tractor power take-off. It is manufactured in two types as mechanical and hydraulic.
- Rotary Mower chops every type of grass, herbs, different pasture plants and other plants that grow on the ground.
- The discs are very close to the ground, thus it heightens the productivity. It crops the herbs in such a way that it dries easily and is collected easily.
- It gets the move from the P.T.O. shaft and makes the chopping by the help of knives turning on the mower.
