

MULTI - PURPOSE THRESHER

Product Code : CTM

General Specifications

Produced by ^{AGRO} COSAN brand. Threshing Machine is working by 2 systems shaft (PTO) with belt and harvests wheat, barley, oat, rye and also chickpeas, lentil, vetch, beans, broad beans, maize, cumin, etc. agricultural products by changing some pulleys and belts.

The necessary drive transmission for these processes can be obtained from tractor pulley by means of belt system or shaft through PTO.

The other outstanding feature with our Threshing machine is to load the harvested grain and pulses in bags or on trailer by means of combined bagging system.

Simple setting and use...Steel body resistant to impacts...Excellent work performance...Perfect operation with all brand tractor...Saving from time and fuel.
